Session: Aug - Dec, 2026
Batch 2024-2028

17/6/26

Capstone Project Expectations and Deliverables

The Capstone Project **(Phase I, Phase II, Phase III and Phase IV)** spans over Semester 5, Semester 6, Semester 7 and Semester 8. It has a total of 12 credits (distributed as **2 credits** in **Semester 5, 2 credits** in **Semester 6, 4 credits** in **Semester 7** & **4 credits** in **Semester 8**).

- During capstone project work, students pursue research on a problem statement of their choice in a team size of **four. The team of four is mandatory.**
- The objective of a capstone project is to build the research capability/ product development and produce a substantial paper/patent that reflects a deep understanding of the topic. **Separate grades are received for Phase I, Phase II, Phase III and Phase IV.**
- Students are strongly encouraged to choose a topic in which they have some competence based on their academic work, passion towards the domain or exploration of future career options. **The completion of the Capstone Project is required for graduation.**
- **Phase II, Phase III and Phase IV** is a continuation of **Phase I** (It should continue with the same problem statement and with the same team).
- The department recommends creating a group **that includes diversity in CGPA levels or gender.** If guidelines of team formation are not followed then the department will facilitate swapping to ensure the same.

Capstone Project Phase -1

Students have to put effort to get the project in to gear. Following are the points that can be considered while preparing for the presentation but not limited as mentioned below.

- Define a clear Problem statement
- Define Project Objectives
- Determine Scope
- Feasibility Study
- Literature Survey
- Overall System Design
- Overall Project Plan (Gantt chart)
- Detailed Project Plan for Phase2 (Gantt chart)

Capstone Project Phase –2

- Extended Literature Survey
- Project Requirement Specifications
- High-Level Design Document (HLD).
- Design philosophy and its suitability for the project–UI design, Back-end design, and algorithms used if any.
- Dataset preprocessing.
- Exploration on all existing models/implementation of baseline model.

Capstone Project Phase –3

- Low-Level Design Document (LLD).
- Inputs on the technology/platforms/middleware to be used if required in project execution.
- Implement the project hardware/software modules.
- Test plan and test cases.
- Demonstrate the final working Software/Hardware model.
- Hard and soft copy of the project report.

Capstone Project Phase –4

Research Paper needs to be published in the Scopus indexed/web of science indexed either in Journal or Conference only

The grading will be as follows:

'S' Grade

- A patent has been granted or published.
- The work must be published/accepted in a Web of Science (WoS) or Scopus-indexed journal/conference.
- Conference Acceptance with Age of conference>=10
- Journal acceptance is also valid.

'A' Grade

- A patent has been filed.
- The work must be submitted to a journal/conference.
- Conference Acceptance with Age of conference <10and>5

'B' Grade

Conference Acceptance withAgeofconference1to5 year

'C' Grade

- Not published/presented/submitted in any conferences or journals.
- Not submitted on approval after the presentation of the work to the panel.
